

# BICYCLE SIGNAL MODULE

## DESCRIPTIONS

The led Bicycle Signal Module is a standard regulatory and wayfinding sign used to designate preferred bicycle routes along roadways or shared-use paths. It provides clear guidance to cyclists and alerts motorists to the presence of bicycle traffic.

- Compatibility: Fits in standard 16" x 18" pedestrian signal housings
- Icons: Bright and clear BICYCLE SIGNAL icons for cyclist safety
- Efficiency: High-efficiency LEDs ensure low power consumption
- Durability: Long product life with superior performance under various weather conditions
- Warranty: 5-year warranty

## SPECIFICATIONS

Model	PD18SWHBKS
Supply voltage:	80 to 135 VAC (60Hz)
Wattage:	White 8W/ Orange 9W
Power factor:	> 90%
THD:	< 20%
Voltage Turn-Off	35V
Operating Temperature:	-40°F to 165°F (-40°C to 74°C)
Lens Material	UV Stabilized Polycarbonate
Color of Lens	Clear
LED Color	Lunar White; Portland Orange
